

Managing Data in the Information Age

Accessing and understanding of your factory floor data play a critical role in operational efficiency and effectiveness. The goal is to transform the raw data into information that can be measured, monitored, and managed.

Each company is unique, and Machine Monitoring Solutions should be adaptable to support those individual needs. Sandalwood, leveraging our solution assessment methodology, provides a user-friendly means to access and display information, speed up the information flow between different departments, and realize scientific, standardized, and efficient management of your operations.

Do you have an automated means of collecting critical data from your factory floor?

Are your existing methods getting the right information, to the right people at the right time?

Do you have the information you need to reduce human errors and increase efficiency?

Do you have to retrieve data from multiple systems to understand the state of your manufacturing operations?

Do you have a roadmap to achieve operational excellence?

Are you protecting your information through industrial cybersecurity best practices?

Where We Can Help!

Sandalwood has over 30 years' experience working with global manufacturers helping them work smarter and work safer. Leveraging a standardized approach to achieve early sustainable value, we assist our clients to effectively apply their efforts to the right people, processes, and technology. Let us and our skilled partner network help you realize your vision.

Sandalwood is an engineering and ergonomics consulting firm. Since our founding in 1989, Sandalwood has successfully engaged in over 3,000 projects helping execute strategic solutions for our clients. By providing their knowledge, research, technology, and resources, Sandalwood supports its clients from the executive level to the factory floor so you can...

Work Smarter. Work Safer.
